

# Additional Advanced Skutterudite TE Module Testing

## EXCELLENT HIGH-POWER, HIGH-POWER DENSITY PERFORMANCE at OTHER HIGH TEMPERATURE CONDITIONS

- Latest Test Results at JPL – June 2018
- JPL Recently Testing at Hot Side Temperatures 530 – 536°C and Cold Side Temperatures ~63°C
- Slightly Below ARL Test Levels Due to Different Temperature Conditions –  $\Delta T$  Lower Due to  $T_c$
- Industrial Application in Oil and Gas Industry
- Excellent performance for that Application
